SILVER SHIELD WILL CUT LOOSE

tricity, a trolley wire will be strung and an electric locomotive will be employed to haul the cars through that long avenue. Power will be obtained from the Telluride company, whose line runs within 300 feet of the mouth of the tunnel, and in consequence no delays will be experienced.

coming from them netted the company an average of \$40 per ton.

In addition to the first-class chutes the workings disclosed, at considerable distance from the shaft in both directions, splendid bodies of a second-grade ore that it would not pay to mine and hoist through the shaft, but with these bodies tapped from below it is calcul-

The testimony that had been adduced up to the time of settlement showed that the amount of ore extracted from Bullion-Beck territory would, according to the estimates from each side, on

tion will be dismissed.

As stated yesterday, the action of the Bullion-Beck against the Eureka Hill has been postponed until the 19th, when Referee Williams will again convene court and hear testimony on the amount of damage that resulted to plaintiff through the alleged trespass and unlawful extraction of ore by the Eureka Hill company. In this case, the plaintiff alleges that the trespass was premeditated, and if this is proven, it will be entitled to damages amounting to three times the actual value of Inauguarate Campaign on Mine. ing to three times the actual value of the ore removed and marketed. The original complaint alleged that ores exceeding \$1,000,000 in value had been unlawfully removed, and the chances are all in favor of this second action being fought to afficient being fought to a finish.

THE DIPPER GOLD MINE.

Cottonwood case, miles from this city, was marked terday. The lot consisted of one carload, and it was sold on controls showing 2.006 ounces gold and .05 of an ounce in silver. The rock ran very high in silica, but for all that it netted the management of the property \$29.95 per ton.

Ore and Bullion.

Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$65,200, as follows: Silver, lead, gold and copper ores, \$44,600: base bullion, \$12,500: gold bars, \$8,100.

This is the property that was recently acquired under lease and bond by W. J. Lawrence, D. B. Hempstead and others, and for the past sixty days or so it has been under active development, with S. C. Semmek, the mining engineer in charge. During that time ment, with S. C. Semmek, the mining engineer, in charge. During that time several cross ledges or what are believed to be feeders to the main lode, lieved to be feeders to the main lode, have been followed up and prospected, while one of them has been stripped for a distance of over 600 feet. The ore just marketed has been taken in doing the work mentioned, and proves conclusively that a gold mine of no mean calibre is on the verge of being opened right at the doors to this city. At the present time Manager Semmek is working a crew of nine men. A tunnel has just been started that is designed to tap what is known as the Blacksmith vein at a depth of 200 feet, and when connections are made, regu-

and when connections are made, regular shipments of good ore are promised. To follow this vein to its connection with the main, or "mother," lode, will, it is believed, be sure of big results, and every effort of the management is to be sent in that direction.

NEW MILL FOR THE LINCOLN. Salt Lakers Order 100-Ton Plant For

Their Idaho Property.

whose property is located in the Pearl district, not far from Boise, Ida., yesterday placed an order with the Sait Lake Hardware company for a 190-ton combination amalgamating and concentrating mill, and the material for it will begin to go forward before the week closes, the intention being to have it in commission within 120 days.

Fred C. Richmond, the hardware company's mill expert, has just returned from an inspection of the property, and he declares the company has a mine that must make its shareholders all wealthy during the next few years. The men behind the enterprise

THE HONERINE FIRE.

First Reports of Its Damage Confirmed-Old Plant to Be Used.

Preparations Now Making to Get

Down to Mining.

After viewing the ruins of the Honerine company's works, Secretary Ellingwood returned to his desk yesterday, while Vice President Scheu remained over to note the progress of work in the new tunnel, which has now been driven in a distance of 318 feet, while ground has been broken for the intermediate shaft.

BULLION-BECK COMPROMISES

WITH GEMINI.

PREPARATIONS are now being made to cut things loose at the Silver Shield company's Bingham property. Andrew Mayberry, who is directing operations at the mine, came in from camp yesterday with the information that by the 10th of next month the old Niagara tunnel, through which it is proposed to operate in future, would be cleaned out and put in repair for its entire length of 3,400 feet. This preliminary task completed, the tunnel will be wired and lighted by electricity, a trolley wire will be strung and an electric locomotive will be employed as possible in the new tunnel work
First Reports of Its Damage Conformation of the Honerine company's works, Secretary Ellingwood returned to his desk yesterday, while Vice President Scheu remained over to note the progress of work in the new tunnel, which has now been driven in a distance of 318 feet, while ground has been broken for the intermediate shaft.

Secretary Ellingwood reports that the fire was undoubtedly of incendiary origin, but who the guilty party or partles were has not yet been ascertained. The wreck, he says, could hardly have been more complete. When he hove in sight of the plant Tuesday morning nothing was to be seen but the three great smokestacks, and they were toppled over before he reached the ground. All the splendid machingroup in the best time three great sixty-drill compressor, is entirely ruined, and when he left the timbering in the shaft. Several hundred feet below the tunnel will be wired and lighted by electricity, a trolley wire will be strung and an electric locomotive will be employed as possible in the new tunnel work-Little Chief. La Reine Manhattan ... Mar. Wash again and make it do service as long

within 300 feet of the mouth of the tunnel, and in consequence no delays will be experienced.

According to old surveys, it will only be necessary to break through something like twenty-five feet of ground from the face of the tunnel till the Silver Shield fissure is encountered, and as the work will be done with power drills, the end of August, at the outside, should disclose what the vein looks like. That no great distance will have to be run till ore is encountered is the firm belief of those best posted on the characteristics of the ledge, and by the time Shield ground is entered little or no doubt is entertained that fine ore in generous quantity will be rolling out through the mouth of the tunnel and from there to market.

These new tunnel workings will tap the Silver Shield at a depth of over 1,000 feet beneath the present lowest workings in the mine. When work was suspended on account of water, three chutes of ore from thirty-five to seven ty feet long had been developed in the bottom, and while it was impossible to go down upon them any farther, they gave every promise of being richer, bigger and stronger with depth. At the point named they were from twelve inches to three feet thick, and the ore coming from them netted the company an average of \$40 per ton.

In addition to the first-class chutes

UNDERWOOD RESIGNS.

Belief in Tintic That Carisa Will Pass Into New Hands.

holist through the shaft, but with these bodies tapped from below it is calculated that the ores can be mined at a profit. Altogether, the prospects for the Silver Shield making a stir during the next few months is bright, indeed. Mammoth, July 30 .- J. A. Underwood,

the Silver Shield making a stir during the next few months is bright, indeed.

BULLION-BECK GETS \$30,000.

Compromise With Gemini Effected Yesterday Morning.

The negotiations commenced the day before culminated yesterday morning in the Bullion-Beck and Gemini managements getting together on a basis of settlement of the pending trespass and damage litigation, and the deal was consummated when the case came on for hearing again before Referee Williams.

FOR THE IRON MINES. Kimberley of Michigan.

ing to the estimates from each side, on its metallic contents, give it a total value of something like \$41,000. This showing, coupled with the further fact that the Gemini has always stoutly maintained that its trespass was unintentional, made it very doubtful whether the plaintiff would ever be awarded more than the amount of damage actually proven. When the Gemini agreed, therefore, to pay over \$30,000 and bear the costs of the suit, the Bullion-Beck consented and the action will be dismissed.

Rimberley of Michigan.

That the Kimberley syndicate's iron properties, out from Cedar City, are to be systematically developed at once was emphasized yesterday when C. W. Kimberley a nephew of P. L. Kimberley, a nephew of P. L. Kimberley. A prived from the Lake Superior from representations of the suit, and the superior superior of the suit, the Bullion-Beck consented and the action will be dismissed.

Kimberley and satisfactions and the superior covered by the 125 claims recently actions of the suit, the superior covered by the 125 claims recently actions of the suit, the superior covered by the 125 claims recently actions of the suit, the superior covered by the 125 claims recently actions of the suit, the superior covered by the 125 claims recently actions the superior covered by the 125 claims recently actions the superior covered by the 125 claims recently actions the superior covered by the 125 claims recently actions the superior covered by the 125 claims recently actions the superior covered by the 125 claims recently actions the superior covered by the 125 claims recently actions the superior covered by the 125 claims recently actions the superior covered by the 125 claims recently actions the superior covered by the 125 claims recently actions the superior covered by the 125 claims recently actions the superior covered by the 125 claims recently actions the superior covered by the 125 claims action of the superior covered by the 125 claims action

Inauguarate Campaign on Mine.

Arrivals from Park City last night brought down the information that J. E. Beveridge had arrived in camp with Osceola ... E. Beveringe had arrived in camp with the expressed purpose of inaugurating systematic development work on the Steel Consolidated company's property. Details as to what plan of campaign had been decided upon were not know by those who heard the news before Initial Shipment From Property Nets \$29.95 Per Ton.

The initial trial shipment from the Dipper property at the mouth of Little Cottonwood canyon and only eighteen miles from this city, was marketed yesterday. The lot consisted of one carload, and it was sold on controls show.

Metal Market.

ing Characterized the Day.

With a strong undertone to the market, business on 'change yesterday was lively in character, and, considering that the top-notchers were not traded in as heavily as usual, the totals for the day were very good. In all, 90,597 shares, with a selling value of \$7,501.99, changed hands, and not'a few of the more modest priced stocks scored substantial advances.

Ajax sold at 22½c up to 3½c, while Century, after opening on a sale at 57c, was never headed till it had brought 64c. From that figure it was eased down on liberal offerings to 61½c and closed on the afternoon board call at 52c.

Daly-West, with limited offerings, moved up to \$52, while its husky neighbor, the Daly-Judge, did business in the forenoon at \$11.99 back to \$11.87½.

May Day, with excellent reports from the mine, did a snappy business between 24c and 25c, while California M. & M. fell from 23½c to 29c.

Consolidated Mercur supplied an even

Mining Notes.

Jack Quinn, the Park City operator, is own from camp again. M. M. Johnson, general manager of the Boston Consolidated, went out to Tintic Duncan McVichie, general manager of the Bingham Consolidated, is scheduled to return from Mexico during the next few hours

to return from Mexico during the next few hours.

The Taylor & Brunton sampler was yesterday in receipt of two cars of ore from Bingham, three from Tintic, two from Alta, two from Nevada and one from Montana.

The Sampson of Bingham contributed two cars of ore to yesterday's market.

The Flagstaff and City Rocks each was represented in yesterday's ore market with a carload of high grade rock.

Horace S. Brown, the veteran Montana smelter man and inventor, the man who invented the famous "horseshoe" roasters in use at the Consolidated Mercur company's big reduction works, is in the city from San Francisco on a short business trip.

A. F. Holden, managing director of the United States company's affairs, returned from his extended eastern trip yesterday. He expects to remain here for at least a month this time. Accompanied by Chief Engineer Fischer, he will visit the new smelter now nearing completion down the valley.

valley.

Tomorrow the offices of the American Smelting & Refining company will be moved to the top floor of the McCornick block, where all the rooms on the south side of the hallway, other than those occupied by the Bingham Consolidated and Carlsa companies, have been fitted up for the American company's use.

OGDEN AND RETURN \$1.00,

SHORTS APPEAL TO THE COURTS

Legal Proceedings Instituted Against Chicago Grain Firms.

OATS CAUSE THE TROUBLE

-PROVISIONS FIRM.

from the Chicago market lately by too much manipulation.

All day legal proceedings were threatened to protect the shorts. Plenteous receipts weakened deferred futures early, but in July the probability that no relief was to be expected at the hands of the buil clique influenced sharp advances and a nervous tone.

The congested option sold from 60 to a strong close at 63, 3 cents higher than yesterday's close. September dipped to 314 early depressed by the early weakness in corn. When other grains rallied, however, and July showed itself strong. September rallied to a firm close, % up at 325.

ness in corn. When other grains rallied, however, and July showed itself strong. Sentember rallied to a firm close, 1/8 up at 3212.

Wheat had a very weak opening, but ultimately recovered its position and advanced. Bearish incentives were heavy receipts, lower cables and fair weather. September was sold very freely early and large quantities came out on stop loss orders as the price broke under 70 cents. The local crowd soon started an up-turn, however, braced to some extent by talk of too-hot weather northwest.

A leading elevator concern took on stuff liberally and augmented the rally. July was wanted and on covering this option took on considerable strength.

The good short interest in September helped in the up-turn. The volume of wheat movement seems to be undiminished, but for the time being this influence seems to have had its full effect. July opened 1/4 down at 73. dipped to 72%, rallied to 55½ and closed strong, 1/5, up at 75½. It is thought there is a pretty fair sized July short interest that will have to settle in the open market tomorrow. September opened 1/60% down at 70%, 40%, declined to 65%, sold to 70% and closed firm, 1/8 up, at 70%.

Corn suffered extreme depression again early today, caused by a renewal of liberal September selling on the influence of lower cables and fine weather, and an aimost total absence of support. The selling was of the same kind that depressed the market for the last week.

Prospects of a very large crop, made doubly probable by perfect corn-growing weather, was the principal bearish incentives. September closed a triffe easy, 1/8 down, at 55%. July was very nervous. Early it was supposed the bull crowd had abandoned the option for good, and the price opened 2 cents off at 55.

On the up-turn in September a little July stuff was wanted. No one would sell it at the low price and July closed strong 2½ up, at 53%.

Provisions were only fairly active, but ruled firm. Hogs were lower. Packers supported well, however, and the close was strong. September pork closed 10 c

TRADING LIGHT AGAIN.

But Few Stocks Showed Activity Yesterday-'Frisco the Leader.

New York, July 30.—There was a further contraction of dealings in today's stock market and a decidedly hesitating and fluctuating tone during the day. Professional traders were watchful for a turn in the tide of the market, and kept prices fluctuating irregularly over a small range during the greater part of the day. There were no developments of great importance.

American stocks sagged early, improved during the greater part of the day. There were no developments of great importance and the provided of the developments of great importance and the been fully executed, and, in fact, turned to be rather smaller than had been feared. There was evidence of continued by liquidation on a large scale during the forencom, which was attributed to the western party, whose operations have come to prove a powerful influence in directing the course of a large speculative following in Wall street, The cessation of this ilquidation was followed by a scatterfollowing in Wall street, The cessation of this ilquidation was followed by a scatterfollowing in Wall street, The cessation of this ilquidation was followed by a scatter of the Rock island plan.

The St. Louis & San Francisco securities were very buoyant, which caused a revival of rumors that they are to be taken in under the Rock island plan.

The semi-official intimations of the law of the representative does not provide for this absorption. The movement served, however, to offise to some extent the depressing effect upon the representative of the Rock Island the representative of the Rock Island the representative of the Rock Island plan.

The abrupt rise in New York Air Brake is characteristic of that stock and was without much sentimental effect elsewhere. The feverish tone of Colorado Fuel is attributed to doubts over the present control of the company, as it will be revealed at tomorrow's meeting of the stockhoiders.

It is reported that some of the shorts on this stock have bought convertible bonds for protection, and the fact that the tights of conversion cease tomorrow may have been an incentive to buying of the stock by shorts.
